4 SERVICES

Let us customize a comprehensive solution for your practice from one or more of the following:

1 TRANSCRIPTION/ SCRIBE

Utilize traditional medical language specialists or EHR remote scribes to increase provider productivity and efficiency and decrease overhead costs. Choose from several input options, including free mobile app.

2 CHART MIGRATION

Specialized teams move selected data from any legacy system to your new EHR, ensuring immediate availability at the patient's initial visit after the new EHR goes live.

3 REVENUE CYCLE MANAGEMENT

Reimbursement professionals process claims accurately and quickly to generate timely revenue. Take advantage of our **FREE** analysis of your current revenue cycle process!

4 DEBT COLLECTION

Recover lost revenue promptly and efficiently. Proven collection and payment processing services facilitate accelerated cash flow and maximize profit.

The healthcare revenue cycle contains many moving parts. Healthcare facilities rely on a patchwork of technologies to manage the entire operation.

We partner with clients to examine the often-undervalued patient document to produce a complete record that accurately supports the associated codes for billing.

The providers that circumvent this process will be faced with rejections, denials, delays, and/or claims coded at a reduced level.

The quality of the health record is the core of a healthy revenue cycle.

In a technology-saturated industry, by far, the best method of success is to combine the expertise and skillsets of transcription, billing, coding, and collections, into one customized solution.

Many options. One customized solution.

Let us take care of the clerical work so you can get back to what is most important to you – your patients.
